

The Complete Multi-Engine Pilot (Complete Pilot Series)

The Complete Pilot series aids student pilots preparing for licensing exams and can be used for home study, certified flight schools, or as a base for student kits. The Complete Private Pilot leads students through the study material for the private pilot license, including all the aeronautical knowledge requirements for the license and rating. The Complete Advanced Pilot, with study material for the instrument and commercial pilot licenses, augments basic subjects with more advanced topics, such as instrument flight rules (IFR) systems, procedures and regulations, and details about radio navigation, flight plans, and cockpit organization. The Complete Multi-Engine Pilot helps students prepare for the multi-engine rating for a pilot license, teaching the fundamentals of flying multi-engine aircraft and the aerodynamic laws that govern multiengine flight.
