

## Video Engineering (Video/Audio Engineering Series)

Highlights of this new edition of the leading video engineering sourcebook include expanded coverage of non-broadcast applications of video, including computer display systems and multimedia applications. Coverage of digital technology embraces all features used in generation, processing, and storage of video signals. Particular attention is given to pathbreaking HDTV technology that will revolutionize television broadcasting, as well as uses of digital video technology in the generation and display of computer images. 220 illustrations.
